

Tumor Boards can be easier with Medting.

CLINICAL COLLABORATION, SIMPLIFIED

Medting is helping health systems like the two examples below to connect physicians for better, faster, more effective communication, including the establishment of virtual tumor boards and other disease-specific collaboration groups. When physicians collaborate, medicine benefits.

Servicio Madrileño de Salud (SERMAS) - 311 groups collaborating across Spain Madrid, Spain

Need:

- A large, multi-location hospital system which is part of the National Health System of Spain and responsible for the public health performance in Madrid
- Required a venue for case sharing and collaboration across their many locations
- Also needed solution to challenges of holding regular tumor boards across all locations, such as scheduling constraints

Medting Results to Date:

- Over 2,200 cases uploaded so far, with over 2,000 clinicians across 10 locations regularly using the site
- Case sharing includes medical image sharing, and there are currently over 9,000 high-quality medical images stored and shared on the site
- Established multiple subgroups within the custom platform, including an award-winning Tumor Committee, which allowed for collaboration without the normal scheduling challenges

Hospital Costa del Sol - Collaboration across 4 medical centers Marabella, Spain

Need:

- A public health agency with four medical center locations sought a clinical collaboration platform
- Required a platform which could facilitate the exchange of clinical cases between medical center locations
- Also wanted to build a repository of clinical cases for educational purposes

Medting Results to Date:

- The platform's 200+ users have collaborated on over 1,400 cases to date
- They've also formed 27 specialty and disease subgroups, including a group to facilitate the hospital's tumor boards in an efficient, location-agnostic environment
- Physicians in the region's most important health system are now connected for case collaboration, meaning better care coordination for patients

About MEDTING

Medting is the leading physician connectivity software, enabling clinicians to seamlessly share data and knowledge securely on the cloud. Medting, powered by Best Doctors, provides clinicians a private, branded forum to easily exchange insights, diagnostic images and other files. The platform is widely used by life science organizations, hospital systems, medical associations and medical schools around the globe.

Benefits

Negate time and scheduling conflicts common with tumor boards, grand rounds and other meetings

Share files and diagnostic images easier and more securely

eCurbside members with sub-specialty expertise

Build an open-source library of medical information

Conduct online education programs and virtual grand rounds

About Best Doctors

Founded in 1989 by Harvard Medical School professors, Best Doctors delivers answers and improved outcomes for patients and their treating physicians by channeling top medical expertise to consult on difficult clinical cases. Our products and services include Medting, ExpertConsult, InterConsultation and Find a Best Doctor. Often our services are seamlessly integrated into the benefit programs and health care offerings of larger employers and health insurance companies.
